

Hsiang-Ting Lin

hsiangting051419@gmail.com | +1 517-402 0348 | [LinkedIn](#) | [Portfolio](#)

Product Designer with experience simplifying complex workflows into intuitive web and mobile products across B2B SaaS, fintech, AI-enabled platforms, and internal tools. Skilled in interaction design, information architecture, high-fidelity UI, rapid prototyping, user research, design systems, and cross-functional delivery from problem framing through engineering handoff.

WORK EXPERIENCE

Training & Employee Communications Coordinator | Awesung Tech Inc.

Jul 2026 - Present

- Identified and framed a high-effort payroll and timekeeping workflow across ~360 weekly records for 30 employees, where exceptions had to be manually surfaced from otherwise valid entries.
- Designed and built a Python/Streamlit prototype that translated 7 recurring exception types into rule-based detection logic, proactively surfacing issues and reducing active first-pass review from ~3 hours to 15-30 minutes.
- Owned validation and iteration by testing edge cases, cross-checking outputs against manual review, and refining detection logic through false-positive, false-negative, and regression checks before broader rollout.

UX/UI Designer (Contractor) | Cogensus — Mental Wellness Platform

Oct 2025 - Apr 2026

- Led end-to-end product design for a multi-role platform, translating requirements into 18+ user flows and 50+ responsive web and mobile screens in Figma through engineering handoff.
- Designed information architecture, interaction patterns, and high-fidelity UI for data-rich dashboards and multi-role workflows, making complex information easier to understand and act on.
- Built and maintained a design system with 30+ reusable components and standardized interaction patterns, improving UI consistency across product surfaces.
- Incorporated stakeholder and engineering feedback to iterate on states, edge cases, and implementation specs, reducing design review cycles by ~50% (4-5 rounds to 2).

UX/UI Designer (Contractor) | AaronBux — SaaS Fintech

Sep 2024 - Mar 2025

- Led 0-to-1 design of 5 portfolio and savings workflows across 4 asset categories, unifying category-specific experiences into a scalable product structure.
- Conducted competitive analysis and translated product requirements into information architecture, interaction flows, and MVP design decisions.
- Scoped AI integration opportunities by documenting user tasks and requirements, partnering with AI engineering to assess technical feasibility and prioritize valuable MVP use cases over later-stage ideas.

SELECTED PROJECT

UX Researcher & Product Designer | EldersConnect — AI Chatbot for Senior Wellness

Jan 2025 - May 2025

- Conducted qualitative interviews with 5 adults ages 62–88 to understand AI comprehension, privacy, dependency, and trust concerns, translating findings into product positioning and interaction decisions.
- Designed conversational user flows and information architecture with clearer transparency and guidance for AI-supported interactions.

EDUCATION

M.A. Media & Information (HCI, UX/UI) | Michigan State University · GPA 3.8/4.0

Aug 2023 - Aug 2025

B.S. Information Sciences (Learning Sciences) | National Taiwan Normal University · GPA 3.88/4.3

Sep 2019 - Jun 2023

SKILLS

Product Design: Product Design, UX/UI Design, Interaction Design, Visual Design, High-Fidelity UI, Information Architecture, User Flows, Wireframing, Rapid Prototyping, Responsive Design, Design Systems, Developer Handoff, Accessibility

Research & Validation: User Research, Qualitative Research, User Interviews, Usability Testing, User Feedback, Competitive Analysis, Edge-Case Testing, Data Analysis, Insight Synthesis

Tools: Figma, Figma Make, Claude, Codex, FigJam, Miro, Framer, Adobe Creative Suite, HTML/CSS, Python, Streamlit, Jira
