

Hsiang-Ting Lin

hsiangting051419@gmail.com | +1 517-402 0348 | [LinkedIn](#) | [Portfolio](#)

Product Designer with an HCI background creating research-informed, accessible experiences for complex workflows across B2B SaaS, fintech, digital health, and AI-enabled tools. Skilled in systems thinking, user research, information architecture, prototyping, design systems, validation, and cross-functional delivery from problem framing and requirements through engineering handoff.

WORK EXPERIENCE

Training & Employee Communications Coordinator | Awesung Tech Inc.

Jul 2026 - Present

- Mapped and reframed a manual payroll and timekeeping workflow across ~360 weekly records for 30 employees, identifying the main review bottleneck and translating policy constraints into explicit product requirements.
- Designed and built a Python/Streamlit prototype with AI-assisted development, encoding 7 recurring exception types and reducing active first-pass review from ~3 hours to 15–30 minutes.
- Validated and iterated the workflow through manual cross-checks, edge-case testing, false-positive/false-negative analysis, and regression checks before broader rollout.

UX/UI Designer (Contractor) | Cogensus — Mental Wellness Platform

Oct 2025 - Apr 2026

- Led end-to-end product design for a multi-role digital health platform, translating evolving requirements into 18+ user flows and 50+ responsive web and mobile screens from concept through engineering handoff.
- Created information architecture, user journeys, page flows, data-rich dashboards, and interaction patterns that made complex system behavior easier to understand and act on.
- Built and maintained a design system with 30+ reusable components and WCAG 2.1 AA-aligned patterns, improving consistency, accessibility, and scalability across product surfaces.
- Partnered with product stakeholders and engineering to refine requirements, states, edge cases, and technical feasibility, reducing design review cycles by ~50% (4–5 rounds to 2).

UX/UI Designer (Contractor) | AaronBux — SaaS Fintech

Sep 2024 - Mar 2025

- Led 0-to-1 design of 5 portfolio and savings workflows across 4 asset categories, unifying category-specific experiences into a scalable fintech product structure.
- Translated competitive research, user needs, and product requirements into information architecture, user flows, prototypes, and MVP prioritization decisions.
- Scoped AI-assisted product opportunities with AI engineering by documenting user tasks, assessing technical feasibility, and separating near-term MVP needs from later-stage ideas.

SELECTED RESEARCH

- EldersConnect — AI Wellness for Older Adults: Interviewed 5 adults ages 62–88 on AI comprehension, privacy, trust, and adoption; insights shifted the concept from companion to transparent assistant and informed feature priorities and conversational flows.
- Instagram Quantitative Research: Analyzed 500+ survey responses using t-tests, regression, and correlation in SPSS, translating behavioral patterns into UX recommendations.

EDUCATION

M.A. Media & Information (HCI, UX/UI) | Michigan State University · GPA 3.8/4.0

Aug 2023 - Aug 2025

B.S. Information Sciences (Learning Sciences) | National Taiwan Normal University · GPA 3.88/4.3

Sep 2019 - Jun 2023

SKILLS

Product Design: Product Design, Systems Thinking, Interaction Design, Information Architecture, User Flows, Wireframing, Rapid Prototyping, Responsive Design, Design Systems, Accessibility, Requirements Definition, Developer Handoff

Research & Validation: User Research, Mixed Methods, User Interviews, Usability Testing, Survey Design, Research Synthesis, Competitive Analysis, Data Analysis, Design QA, Edge-Case Testing, Regression Testing

Tools: Figma, Figma Make, FigJam, Miro, Framer, Jira, Adobe Creative Suite, Python, Streamlit, SPSS, Claude, Codex
